Technical Skills:

Python, Excel, Html, Css, Javascript, Php, Reactjs, Pandas, Numpy, Seaborn, Bootstrap, Tailwind, Sql, Mysql.

Soft Skills:

Problem-solving, Critical Thinking, Communication, Teamwork

EDUCATION

Bachelor of Science in Computer Science

Mehran UET, Jamshoro

2021-Present

Relevant Coursework: Database Management Systems, Data Analysis Techniques, Web Development, Programming Languages (Python, Java, C++)

Intermediate

BISEH, Hyderabad

2020

Relevant Coursework: Mathematics, Physics, Chemistry.

LANGUAGES

English

Urdu

PROFILE

Highly motivated Bscs student at Mehran UET with a passion for transforming data into actionable insights that inform decision-making and drive positive outcomes. I leverage my skills in web development and programming to craft user-friendly web applications and efficient code solutions, ensuring data is presented in a clear and accessible way. I'm eager to leverage this combined skillset to tackle challenging problems in fast-paced environments and contribute to innovative projects that make a real difference.

WORK EXPERIENCE

Full Stack Web Developer Intern

Gexton

2023

- Developed and implemented functionalities for over 15 real-world web applications, gaining valuable experience in the full-stack development lifecycle.
- Key projects included:
- Google Auth Login: Integrated Google authentication for seamless user login experience.
- E-commerce Frontend: Designed and developed a user-friendly e-commerce frontend, ensuring a smooth shopping experience.
- Chat App: Built a real-time chat application, facilitating communication and collaboration.
- Image Editor: Created an interactive image editing tool within the web application.
- CRUD App: Developed a CRUD (Create, Read, Update, Delete) application to efficiently manage data.
- Quiz System: Implemented a dynamic quiz system for interactive learning and assessment.
- PDF Converter: Built a feature to convert various file formats to PDF within the application.
- Collaborated effectively with senior developers on project requirements, code reviews, and troubleshooting.
- Utilized [List specific technologies used at Gexton, e.g., HTML, CSS, JavaScript, backend frameworks like Python/Django or Node.js/Express] to build robust and scalable web applications.

Programmer & Data Analyst

Self

2020-Present

- Engaged in personal projects to further develop programming and data analysis skills.
- Data Visualization Dashboard (Python, Tableau): Developed an interactive dashboard to analyze and visualize data sets, providing insights for informed decision-making. (Specify the type of data analyzed if relevant)
- Machine Learning Model (Python): Built a basic machine learning model using Python libraries like scikit-learn to address a specific problem (Specify the problem if applicable).
- Personal Website: Designed and built a personal website to showcase skills and projects.
